WHAT'S YOUR NUMBER?

*As a doctor of chiropractic, many people only think of us as a "Back Doctor", working only on the frame of the body (vertebrae, nerves, muscles, ligaments), with the understanding that when the body's frame is in optimal alignment and balance, it functions at a higher level of wellness, heals quicker and is without symptoms. Well that is only half of our job!! As a chiropractor we are also a "body chemist" and the most miraculous laboratory in the world is the Human Body!*
